FORTE
BUSINESS SOLUTIONS

WHAT IS
FORTE BUSINESS SOLUTIONS?

Forte Business Solutions is a modern firm which ensures that all your IT initiatives support the business goals. We transform business systems to develop for you precise and tailored enterprise solutions according to what you need. We make IT work!

"

WE MAKE THE COMPLICATED SIMPLE, AWESOMELY SIMPLE, THAT'S OUR EXPERTISE

HOW DO
WE DO IT?

We shape future of businesses by transforming their People, Processes, Products and Services, using our innovative IT solutions & practices. Our consultants, international team alliances and partnerships ensure to provide unparalleled services across a broad spectrum of industries.

OUR
PLEDGE!

To be a software solution provider in an environment of fairness, honesty and courtesy towards our Clients, Employees and Stakeholders. To help customers achieve their business objectives by providing excellence and innovation, best in class IT services and consultation.

OUR
TEAM!

Forte forged a team of elites with professional skills, initiatives, courage for innovation and strong capacity of execution, which brings to the company constant new ideas, steady development and expansion.
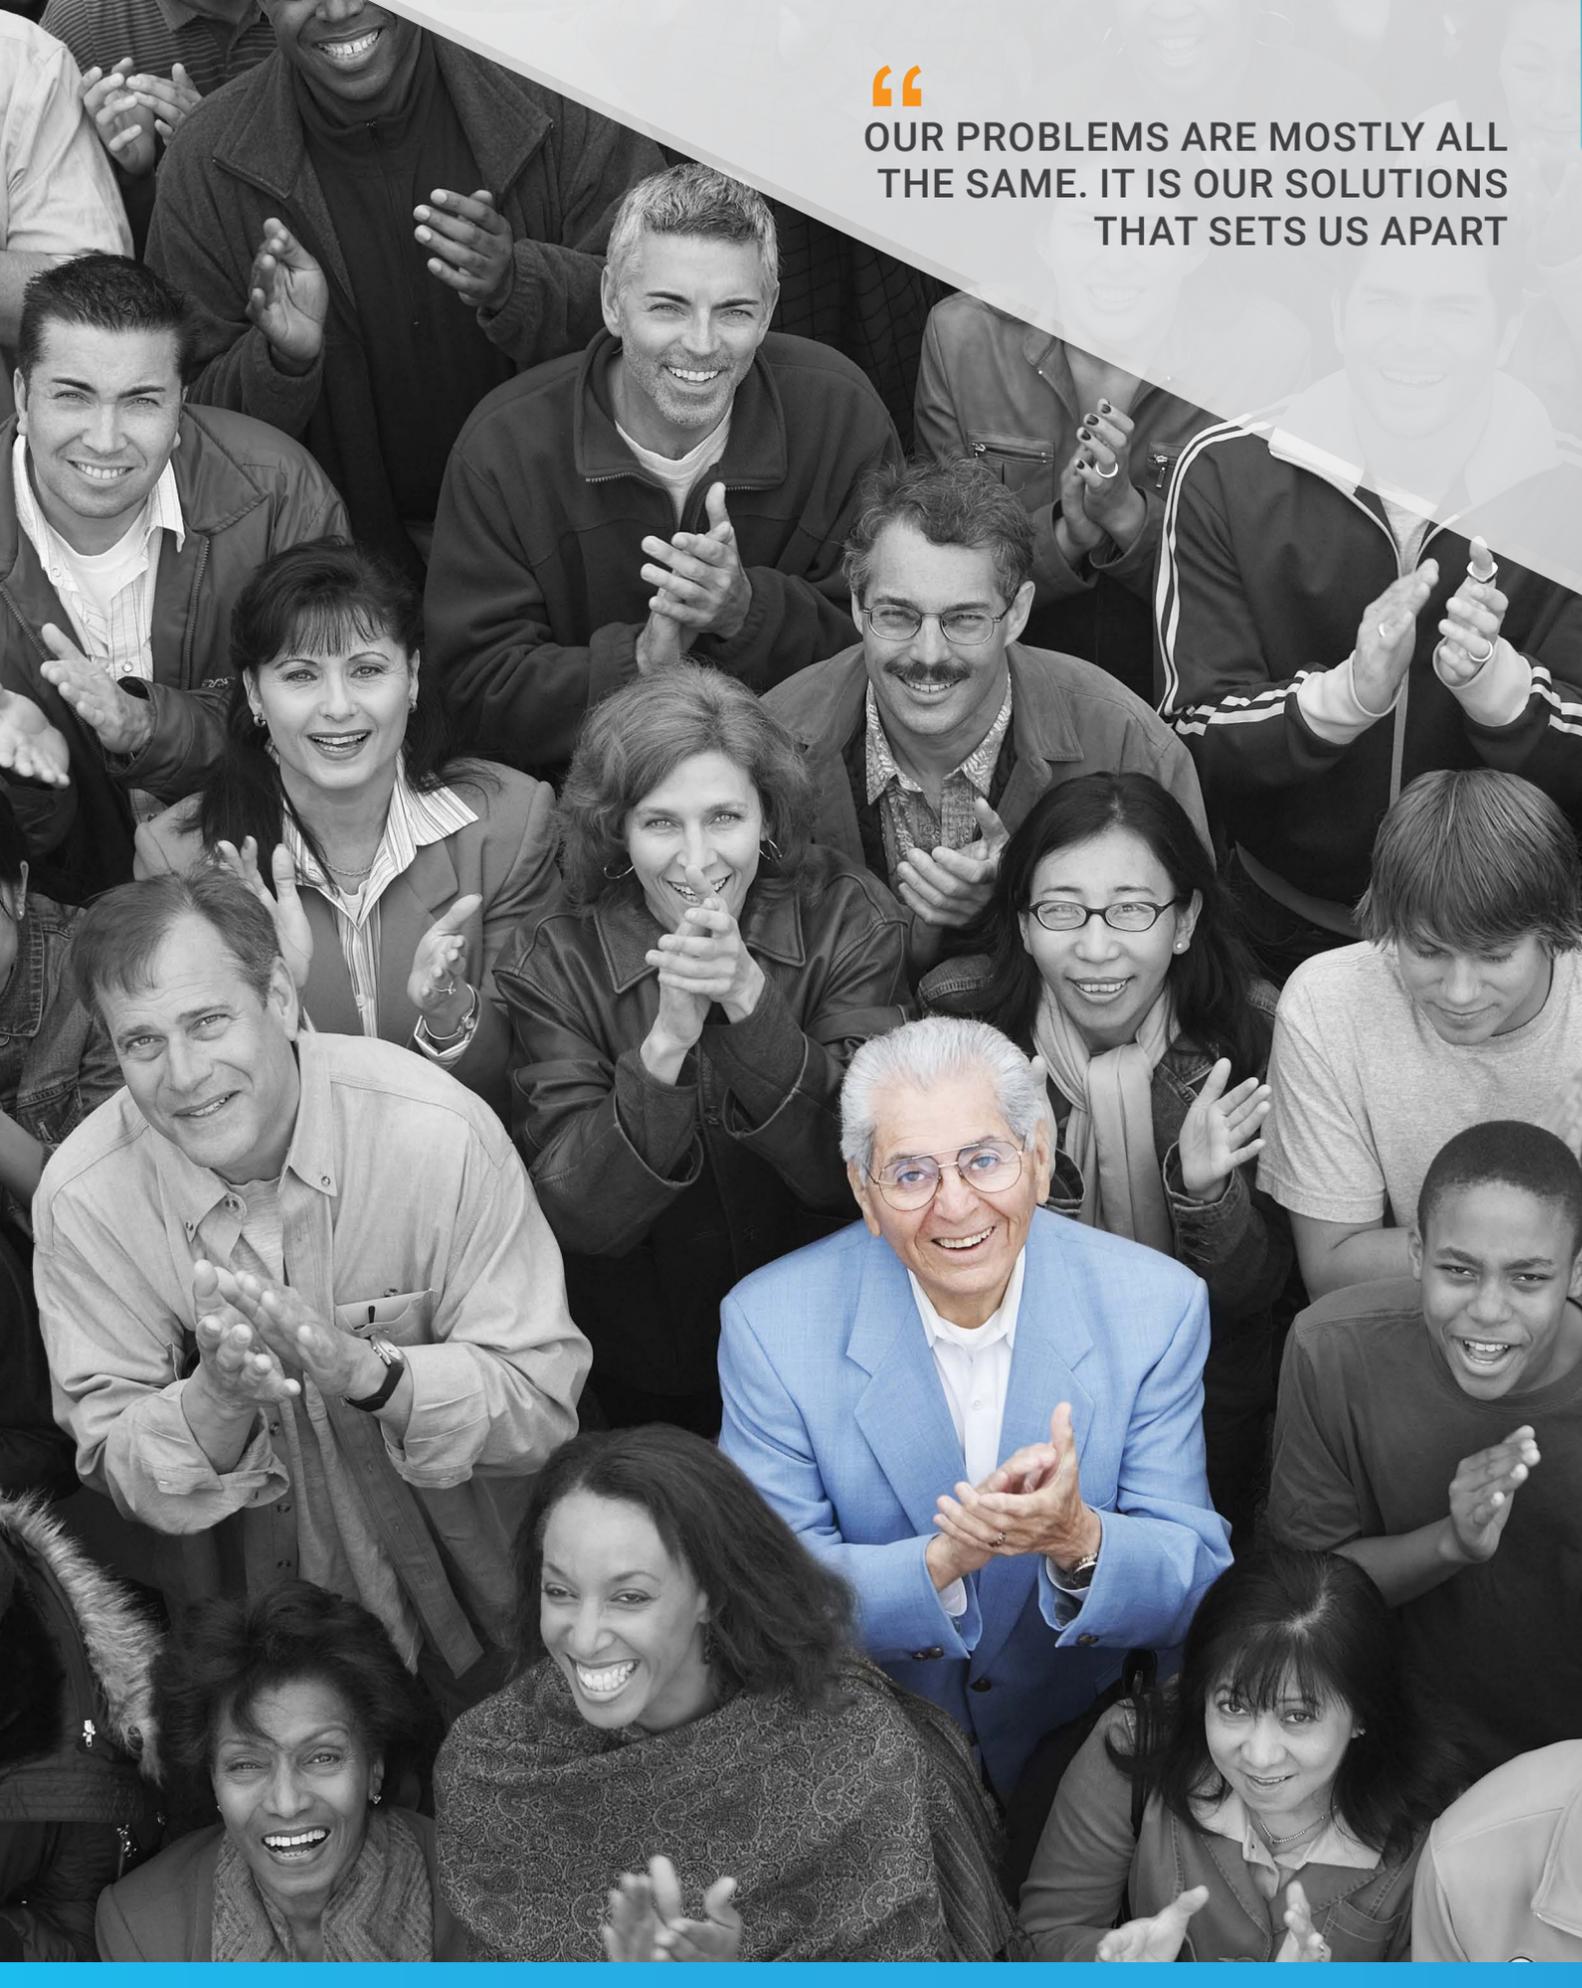

Their tacit cooperation in solution design, development and support demonstrates in great depth the work guideline of taking "solutions as lifeline and customers as core".

MESSAGE FROM
MANAGING DIRECTOR

Forte Business Solutions, is recognized as specialized IT solution provider; leading, system transformation from struggling to sustaining, from declension to growth, and from conventional to innovative. Our mission is to create new paradigm beyond restrictions of time, resource and skills. With this firmly rooted principle in our DNA, business excellence is an inevitable consequence. We promote unique viewpoints amongst our team and challenge each of us, every day, to think beyond our traditional frames of reference. As our customers seek to do more with less, they will find a worthy solution partner in us.

- SHAHZAD ALI

WHAT SET US APART!

TECHNOLOGY AGNOSTIC **01**

Being unbiased towards use of different technology allows us to choose the best solution for our clients. Our technology agnostic approach helps to analyze business requirements instead of jumping headfirst into technology.

3-TIER CONSULTANCY **03**

We defy conventional levels of expertise that the solution providers usually have for different phases of solution development. We engage Industry Experienced Experts along with our Functional and Technical Consultants.

360 DEGREE BUSINESS ANATOMIZATION **02**

Using a 360-degree evaluation format, we gather perspectives from business owners, stakeholders, team members, clients, government and authorities. This model of assessment evaluates ability of mapping business strategies with technology initiatives.

QUALITY ASSERTION PARADIGM **04**

Our QAP Engineers are not only process caretakers but also the central catalyst for change. Our assurance goes beyond process compliance to involvement in strategic organization governance. Thus, delivering significant cost, time and process efficiency to our customers.

UNEXAMPLED
METHODOLOGY

We claim to be distinctive. Our uniqueness gives us an unparalleled position in the market. A traditional approach in a Software Project Implementation & Management relies on, only two experts i.e. Functional Consultant and the Technical Consultant. It also gives more importance to processes instead of the solution. Therefore, our project management gurus along with our Industry Experienced Experts have invented an unexampled methodology called **AIMS**[©]. It develops & delivers, technology solutions using adaptive planning, instinctive approach and continuous evolution.

ITSM & SECURITY
SOLUTIONS

Usually the business and IT departments of companies don't see eye-to-eye and have a lot of differences of opinions. This can be avoided by implementing ITSM within the organization which in turn increases the productivity of the business. Similarly, recognizing the importance of both security and privacy safeguards for systems, organizations and individual, we facilitate the development of stronger, more robust and secure, IT systems.

ITSM

- Service Request And Knowledge Management
- Release/Problem/Change Management
- IT Asset Management
- Service Catalog
- Configuration Management DB
- Helpdesk & Ticketing Management

SECURITY

- Email Spoofing Analysis & Protection
- Digital Forensic Services
- Security Awareness Training
- Cyber Insurance Risk Management
- Cyber Threat Intelligence Services
- Application Fraud & Account Monitoring

79% Reported that adding more IT staff is not a solutions for event and alert overload

41% Are deploying 10 or more IT monitoring tools

46% Of businesses identified a cyber security breach in the last year
